VI	Claim Study by Means of Disposition	101
VII	Market Share and Experience Data by Company	113
	Definition of Terms	137

#### **Executive Summary**

#### **Data Sources**

This report is based upon data provided by insurers and self-insured hospitals to the Missouri Department of Insurance. The information draws on open and closed claims data that insurance companies and self-insured hospitals are required to report under Section 383.115 RSMo. The department makes every possible effort to make sure this data accurate; however, the accuracy of this report still depends largely upon the accuracy of the data filed by the insurers and self-insured hospitals.

As a caveat, readers of this report are cautioned that claims covered by self-insureds and largely unregulated surplus lines companies are underreported. While all malpractice providers are required by statute to report, the MDI has limited regulatory authority over such entities. While the actual number is unknown, the MDI believes that between 15 and 20 percent of claims go unreported. Three-fourths of surplus lines companies and Risk Retention Groups, which reported total losses of \$12.5 million on their financial statements, filed no claims with the department. In addition, it is believed that the rate of non-reporting by self-insured entities is even higher.

The department is currently assessing various ways to encourage compliance among such entities. Nevertheless, this report does not capture the full universe of malpractice actions. Readers should bear in mind this deficiency when interpreting trends. For example, an increase or decrease in reported claims may represent a shift in malpractice business between sectors as much as indicate changes in actual claim trends.

Additional information is derived from the Page 15 supplement to the annual statement that companies are required to file. These data contain information about type of business, company, volume of business, market share, loss ratio, and insurer expenses.

#### Highlights

Data for physicians and surgeons, hospitals and other medical care providers are summarized in this report. The category of "other medical care providers" includes—but is not limited to—dentists, nurses, nursing home, chiropractors, pharmacies, optometrists, podiatrists/chiropodists, clinics, and corporations.

Among the findings of the report are:

■ Profitability The overall Missouri medical malpractice market posted positive underwriting results for the first time in five years. Claims incurred plus Missouri-specific adjustment and administrative costs amounted to 80.2 percent of earned premium in 2004 for the total market, and 79.6 percent for the licensed or admitted market (excluding the largely unregulated excess and surplus lines companies). This figure has exceeded 100 percent every year since 1999.

Overall profitability may be assessed by adjusting Missouri underwriting results for expenses that are not state or line specific, such as investment returns, various unallocated costs, and federal taxes. These figures are produced by the NAIC and are not yet available for 2004. However, the Missouri underwriting experience, exhibiting a low loss ratio and declining expenses, is strongly indicative of a return to profitability.

Incurred claims as a percent of premium (loss ratio) declined to 52 percent in 2004, a result

associated growth in premium earned from \$210.7 million to \$243.4 million, and a decline in incurred losses from \$189.5 million to \$126.6 million. In addition, defense and adjustment expenses declined from \$69.9 million to \$50.4 million.

■ Reported malpractice claims against medical providers fell by 20 percent in 2004, following an 11 percent decline in 2003. The number of reported claims peaked in 2000 at 1,986, and has tended to decline thereafter. In 2003, 1,730 claims were reported to insurers, falling to 1,379 in 2004. For physicians and surgeons, the number of new claims declined from 903 to 836 in 2003, and to 630 in 2004.

As previously noted, due to substantial underreporting by self-insureds and surplus lines companies, MDI is unable to ascertain the reasons for this trend.

- Reported claims closed against all providers increased for the third consecutive year, reaching the highest number since 1996. In 2001, insurers closed 1,504 claims. The number of closed claims has increased in every subsequent year, to 1,704, 1,713, and 1,786 in 2002, 2003, and 2004 respectively. However, the number of paid claims has declined since 2002. During that year, insurers closed 575 paid claims, declining to 535 in 2003 and 505 in 2004.1
- Claims closed against physicians and surgeons also reached the highest level since 1997. In 2004, 876 claims were closed, compared to 748 during the prior year. Paid claims increased form 192 to 219. Claims closed against hospitals declined during 2004, dropping from 326 to 325, while paid claims decreased from 133 to 123.
- The average award per paid claim increased sharply for the third consecutive year, reaching a historic high. In 2001, average awards declined to \$166,623, but then increased to \$207,627 in 2002, \$212,006 in 2003, and \$252,666 in 2004. Average payments for physicians and surgeons followed the same trend, reaching \$287,733 in 2004. Average payments for hospitals departed from the overall trend, declining to \$177,740 in 2004, down from \$195,034 for the prior year.
- Factors associated with rising payments continued to exert upward pressure on claim costs. Previous MDI analysis has shown that average awards are highly sensitive to medical inflation, the growth in real wages, and average injury severity.

Average Injury Severity The injuries associated with medical malpractice claims are coded on a nine-point scale, with 1 representing minimal physical harm and 9 representing death. By this scale, the average injury severity associated with paid claims increased in 2004 to 6.1, tying the historic high reached in 2002. For claims against physicians and surgeons, excluding nurses, dentists, other practitioners, and hospitals and clinics, average injury severity on paid claims reached a record high of 6.5. Injury severity category 6 represents "significant permanent" injuries, such as loss of limb or organ.

In 2004, the number of paid claims on non-permanent injuries (categories 1-4) declined from 189 to 158, and claims for deaths also declined from 174 to 158. Claims for permanent injuries, ranging from non-disabling injuries such as loss of fingers or damage to organs to severe or debilitating injuries

<sup>1</sup> These figures differ substantially from those reported in previous reports. The discrepancy is due to a large volume of revised claim filings received by MDI from insurers. These filings consisted primarily of claims closed without payment.

including blindness, quadriplegia, loss of limb, or brain damage, increased from 172 to 189. Permanent injuries, especially those requiring extensive and perhaps life-long medical care, represent the most expensive category of claims.

Increases in average injury severity are apparent over many years, though the underlying causes of the trend are not well understood. Nevertheless, the trend undoubtedly plays a significant role in the increasing awards observed over the past several years. However, the average injury severity associated with new claims that are currently pending indicate that the trend may be diminishing. For all providers, average injury severity of reported claims has declined from a high of 6 in 2001, to 5.6 in 2004. However, how trends in reported claims might impact average injury severity levels of *paid* claims in the future is unknown.

Inflationary Pressures Together, medical care and lost wages are the primary economic components of malpractice awards. These two factors have exerted a significant upward pressure on average awards in recent years. Each year between 1999 and 2004, health care costs in Missouri have increased by an annual average of 4.7 percent, while average wages have increased by 3.2 percent. Both costs increased more rapidly than the overall rate of inflation, which grew by an annual average of 2.6 percent over the same time period. In 2004, health care costs increased by 8.2 percent, though average wages increased at a rate slightly less than the overall inflation rate.

Source: Bureau of Labor Statistics

■ For the licensed market, overall claim payments increased in 2004 even as incurred claims costs declined. Claim payments made in 2004, typically for claims opened in prior years, increased by 31.5 percent to \$110.1 million. Claim costs incurred in 2004, representing primarily insurers' expectations of future payouts on pending claims, declined by 39 percent to \$100.9 million. The relative magnitude of *paid* vs. *incurred* claims in 2004 represents a reversal from prior years, when claims payments in a given year had lagged behind losses incurred during the same year. The 2004 figures suggest, then, that insurers anticipate an improved claims environment in the future. A similar pattern is observed for the overall market, including excess and surplus lines companies.

For physicians and surgeons, excluding other practitioners such as dentists, nurses, and clinics and hospitals, paid claims increased from \$53.9 million to \$81.1 million in 2004, while incurred claims declined from \$109.5 million to \$91.2 million.

The most prevalent of alleged medical errors leading to a malpractice payment are those associated with surgery and diagnosis. Beginning in 2004, the MDI adopted the "error and

omission" codes used by the National Practitioner Databank (NPDB). Errors are grouped into ten broad categories. In descending order of prevalence of paid claims, these categories are Surgery (26.5% of paid claims), Diagnosis (24.4%), Treatment (23.0%), Medication (8.9%), Monitoring (7.3%), Obstetrics (4.8%), Miscellaneous (2.6%), Anesthesia (1.6%), IV and Blood Products (0.6%), and Equipment (0.4%). The single most common reason was "failure to diagnose," or the allegation that a provider improperly concluded that a patient has no disease or condition worthy of observation or follow-up. Additional information is presented separately for physicians and surgeons and hospitals.

### **Section I**

## **Major Historical Trends**

This section contains graphs depicting trends in the medical malpractice insurance for:

- All medical care providers
- Physicians & Surgeons only
- Hospitals only

The tables and graphs are further categorized by:

•	Market Trends:	Page	
	Licensed and non-admitted premium		3
	Analysis of carriers	4	
	Profitability	6	
	Historical premium and losses	8	
	Actual and inflation-adjusted premium earned	14	
	Actual and inflation-adjusted paid losses	15	
	Loss ratio for Missouri	16	
	Number of insurance writers in Missouri	17	
•	Frequency and Severity and Origin of Claims:		
	Number of new claims reported to insurers	18	
	Average injury severity of new claims reported to insurers	19	
	Number of closed claims	20	
	Average injury severity of closed claims	23	
	Average indemnity of closed claims	24	
	Average loss adjustment expense of closed claims	27	
	Claims by county jurisdiction	30	
	Act and omission categories	39	
•	Claim Disposition:		
	Number of months for paid claims from incident to disposition	51	
	Number of months by injury severity from incident to disposition	52	
	Percentage of closed claims after lawsuit filed	55	
	Percentage of closed claims in favor of the plaintiff after lawsuit filed	56	
	Percentage of court dispositions closed after judge/jury verdict	57

Data is not available on physicians and surgeon coverage in the nonadmitted market.

This exhibit combines data from the Missouri State Page of the Financial Annual Statement with figures from the NAIC's Profitability Report (not yet available for 2004). The first four columns are derived from data that insurers report on a state-by-state basis. In Missouri, for example, insurers incurred claims costs equal to 52 percent of earned premium (loss ratio). An additional 28.1 percent of premium went to Missouri specific underwriting expenses, taxes and fees. Missouri specific claims and underwriting expenses therefore totaled 80.2 percent of premium in 2004, producing a figure for the underwriting experience column of 19.8 percent (or 100% - 80.2 %).

The final two columns indicate the profitability of Missouri's malpractice market. The column labeled "underwriting profit" adjusts the "underwriting experience" column by adding various fixed or unallocated costs that are not reported on a state-by-state basis. These costs might include general costs unrelated to a specific line of business (office costs, for example), or that are not directly associated with business in a single state. The NAIC allocates such costs based on the profitability formula detailed in the profitability report. The last column labeled "profit on insurance transaction" includes the net impact of taxes and investment returns on "underwriting profit." Thus, in 2003, insurers reported an underwriting loss of 44.2 percent, but this loss declined significantly after including investment returns and tax effects to 18.2 percent.

Figures for "underwriting profit" and "profit on insurance transactions" have not yet been released by the NAIC for 2004. However, insurers' financial prospects improved significantly in MO in 2004: a positive underwriting experience occurred for the first time since 1998. After adjusting this figure for fixed or unallocated costs, taxes, investment returns, insurers will almost certainly post a profit.

## Bodily Injury Severity of Paid Claims - All Medical Care Providers

Mean number of months from incident to disposition

See Section III for the definitions of the severity categories.

## Bodily Injury Severity of Paid Claims - Hospitals

Mean number of months from incident to disposition

See Section III for the definitions of the severity categories.

## Bodily Injury Severity of Paid Claims - Physicians and Surgeons

Mean number of months from incident to disposition

See Section III for the definitions of the severity categories.

## Claims Closed After Lawsuit Filed All Medical Care Providers

### Physicians & Surgeons

## Claims Closed After Judge/Jury Verdict

(based on all lawsuits filed)
All Medical Care Providers

## **Physicians and Surgeons**

## Hospitals

# In Favor of Plaintiff After Lawsuit Filed All Medical Care Providers

### Physicians & Surgeons

## Hospitals

# **Section II**

# **Claim Severity**

This section classifies individual claim data based on the amount of indemnity paid. The data are divided into summaries of All Medical Care Providers, Physicians and Hospitals for the years 2002, 2003 and 2004. Summaries include:

- Average Number of Months from Occurrence to Close
- Number of Claims Reported and Closed
- Cumulative Percentage of Number of Claims on Claims Closed
- Total Indemnity Paid on all Closed Claims
- Cumulative Percentage of Indemnity Paid on Claims Closed
- Average Economic Damage Paid on Closed Claims
- Average Non-economic Damage Paid on Closed Claims
- Average Indemnity Paid per Defendant (Excludes LAE)
- Average Loss Adjustment Expense Paid per Defendant

The following terms are used in subsequent tables:

- Economic damages: damages arising from monetary harm including medical bills, loss wages and lost earning capacity. (Unlimited in amount).
- Non-Economic damages: damages arising from non-monetary harm including mental anguish, inconvenience, physical impairment, disfigurement, loss of capacity to enjoy life and loss of consortium. (Malpractice insurance does not insure punitive damages.)
- Loss Adjustment Expenses: includes expenses paid to defense counsel and all other allocated loss adjustment expenses, including filing fees, telephone charges, photocopy fees, expenses of defense counsel, etc.

### SUMMARY BY AMOUNT OF INDEMNITY AWARDED FOR EACH DEFENDANT

### CLOSED IN 2004 FOR ALL MEDICAL CARE PROVIDERS

### **Section III**

# Claim Severity by Injury Severity And Lapsed Time to Disposition

This section illustrates the paid claim count, the average paid indemnity (economic + non-economic), the percent change of paid claims, and the percent change of the average paid indemnity by bodily injury severity for the past four years. These tables are displayed by the major business classifications and by the months from incident to disposition for all medical care providers, physicians and hospitals. The following define the severity categories:

- Severity 1, 2, 3, 4 emotional distress, insignificant or temporary injury, including contusions, minor scars, infections, fracture, burns, drug side effect.
- Severity 5, 6, 7, 8 permanent injuries, such as loss of limb, damage to organs, deafness, blindness, brain damage, paraplegia.
- Severity 9 death.

### **Section IV**

### **Indemnity Analysis by Company**

Section IV contains the total number of claims reported to the insurer, total number of closed claims, the number of claims closed with payment, the total indemnity paid (economic + non-economic), the total economic damage paid and the total non-economic damage paid by each company and self-insured hospital reporting closed claim data.

The past three years are recorded separately and the companies are listed in descending order by the number of paid claims.

### **Section V**

### **Indemnity Analysis by Professional Specialty**

This exhibit contains the total number of claims reported to the insurer, total number of closed claims, the number of claims closed with payment, the total indemnity paid (economic + non-economic), the total economic damage paid and total non-economic damage paid by profession specialty code. The profession specialty code is a uniform rating/underwriting code developed by Insurance Services Office (ISO).

The data are ranked in descending order by the total number of paid claims closed for the past three years (2002 through 2004).

# Section VI Claim Study by Means of Disposition

This section contains a thorough claim study by means of disposition. We have two exhibits containing the claim study by means of disposition for physicians and surgeons and for hospitals. Within each disposition type the following data is presented:

- Number of Claims Closed
- Percentage of Claims by Means of Disposition
- Average Number of Months from Incident to Report
- Average Number of Months from Incident to Disposition
- Average Bodily Injury Severity (Severity codes defined in Section III)
- Average Economic Damage Paid per Claim
- Average Non-Economic Damage Paid per Claim
- Average Total Indemnity Paid per Claim (Economic + Non-Economic)
- Average Loss Adjustment Expense Paid per Claim

## **Section VII**

## **Market Share and Experience Data by Company**

This section contains the written premium, earned premium, paid losses, incurred losses, market share and loss ratio of all Medical Malpractice writers in Missouri. The data was derived from the Missouri Supplement of the Annual Statement. In addition to a total for medical malpractice insurance, the data is broken down into five categories of malpractice insurance:

- Physicians & Surgeons
- Hospitals
- Dentists
- Nurses
- All Other

The reports are presented in descending order of market share by company. The data for this exhibit is independent of the closed claim data used in all preceding tables.

## **Definition of Terms**

Cash Flow Loss Ratio – Direct paid losses divided by direct written premium.

**Economic Damages** – The amount of damages arising from pecuniary harm including, without limitation, medical damages and those damages arising from lost wages and lost earning capacity.

**Direct Incurred Losses** – Total indemnity costs of insured claims, including both sums already paid and estimates of those yet to be paid, before reinsurance has been ceded and/or assumed.

**Direct Losses Paid** – Total indemnity costs of insured claims, including amounts paid in the current year for claims arising from coverage in prior years, before reinsurance has been ceded and/or assumed.

**Direct Premium Earned** – The part of premiums attributable to the coverage already provided in a given period before reinsurance has been ceded, and/or assumed.

**Direct Premium Written** – Amount charged when a policyholder contracts for insurance coverage before reinsurance has been ceded and/or assumed.

**Loss Ratio** – Direct incurred losses divided by direct earned premium.

**Non-Economic Damages** – The amount of damages arising from non-pecuniary harm including, without limitation, paid, suffering, mental anguish, inconvenience, physical impairment, disfigurement, loss of capacity to enjoy life and loss of consortium.

**Non-Admitted Market** – Sales by surplus lines carriers and risk retention groups. Surplus lines carriers have no Missouri license, and MDI does not approve policy forms or review rates. These insurers, however, have a license in at least one state and have demonstrated the financial ability to write policies for hard-to-obtain coverage in Missouri. Risk retention groups – whose members have similar needs for liability coverage – are organized under federal law and exempt from regulation except by the state that they chose as the domicile for their license.
